

Assignment 4: Arrays

1. Create a function that takes in 4 strings and creates an array out of them then prints out the array (2 points)
2. Create a function that given an array below:
 `var cities = arrayOf("harare", "mumbai", "dodoma", "jakarta")`
prints out the names of the cities in the correct grammatical case. (2 points)
3. Create one function that given the below array:
 `var numbers = arrayOf(32, 17, 4, 213, 78, 43, 90, 31, 3, 73, 11, 158, 62)`
 - (i) prints out the sum of the second and fifth elements (1 point)
 - (ii) prints out the index of 158 (1 point)
 - (iii) prints out the elements in ascending order (2 points)
4. Create a function that takes in 3 names and returns a string array containing all 3 names. (2 points)
